SUMMARY

Software Engineer with 5+ years of experience in backend development using Python, Django, and AWS. Experienced in designing scalable systems and cloud-based architectures, with a strong focus on reliability and performance. Also worked on evaluating and benchmarking AI systems through real-world software engineering tasks and model validation. Combines solid engineering fundamentals with hands-on experience in AI-driven systems.

SKILLS

Languages: Python, JavaScript

Backend Development: Django, DRF, Celery, Redis, MQTT, RabbitMQ, Selenium

Databases: PostgreSQL, MySQL, MongoDB

DevOps and Deployment: Docker, Docker Compose, CI/CD

Cloud Technologies: AWS (certified), DigitalOcean

Version Control: GitHub, GitLab

Frontend Development: HTML, CSS, jQuery, ElectronJS

Others: LLM Training, AI model api integration

EDUCATION

Daffodil International University

B.Sc. in Computer Science and Engineering
2017 – 2021

Govt K.M.H College

Higher Secondary Certificate
2013 – 2016

CERTIFICATIONS

Solution Architect - Associate - Amazon Web Services - May 2024

Python Specialization - Coursera - Jun 2020

Django Specialization - Coursera - Jun 2020

PROFESSIONAL EXPERIENCE

Python Developer

Turing | June 2025 - Present | United States | Remote

- Contribute to agentic AI system evaluation by designing and validating structured reasoning and tool-use tasks.
- Manage end-to-end task workflows using Python/Django-based internal platforms, ensuring quality and timely delivery.
- Collaborate with tooling teams and support operational reliability using AWS infrastructure.

AI Trainer - LLM Benchmarking

Turing | July 2024 - May 2025 | United States | Remote (Part Time)

- Served as a trainer for software engineering benchmarks at a leading AI research organization, evaluating real-world coding tasks and expected implementations.
- Assessed model-generated outputs by identifying logical errors, edge-case failures, and requirement gaps.
- Validated solutions using end-to-end and visual testing to ensure accurate and reliable benchmarking.

Software Engineer

TiCON System Ltd. | June 2020 - Sept 2025 | Bangladesh | On-site

- Led 5+ end-to-end software projects, delivering scalable solutions on time with high quality.
- Designed and developed backend systems and REST APIs for 20+ applications using Python and Django.
- Built and integrated machine learning features and sensor-based communication systems following vendor protocols for international clients.
- Architected and deployed cloud-based solutions, while also developing responsive web interfaces and desktop applications using JavaScript, jQuery, and ElectronJS.
