

K M EMON AHMED

Software Engineer | Backend & AI Systems

kmemon.ah@gmail.com | +880 1781 813727 | linkedin.com/in/kmemonahmed

SUMMARY

Software Engineer with 5+ years building scalable backend systems in Python and Django, with hands-on experience in LLM evaluation, agentic AI task design, and ML integration across production environments. AWS certified. Open to backend, AI/LLM, and platform engineering roles.

KEY SKILLS

Backend Development: Python, Django, Django REST Framework (DRF), PostgreSQL, MySQL, MongoDB, Celery, Redis, MQTT, RabbitMQ, Selenium.

DevOps and Deployment: Git, AWS, Docker, CI/CD, Linux.

AI & LLM Systems: LLM Evaluation, Benchmark Design, Agentic AI Task Design, AI Model API Integration.

Others: JavaScript, jQuery, HTML, CSS, ElectronJS.

WORK EXPERIENCE

Python Developer | Turing | Remote | Contract

Oct 2025 – May 2026

- Designed and validated 200+ structured reasoning, tool-use, and agentic AI tasks for LLM benchmarking pipelines, directly contributing to model evaluation accuracy and scoring consistency.
- Built and maintained Python/Django internal platforms supporting end-to-end AI evaluation workflows, reducing task lifecycle bottlenecks across quality control and delivery operations.
- Evaluated model-generated code outputs against real-world software engineering requirements, identifying logic failures, incorrect implementations, and edge-case gaps across multiple model versions.
- Performed functional, visual, and end-to-end validation of AI-generated solutions to ensure accurate issue resolution and fair benchmarking against SWE-bench-style criteria.
- Collaborated with cross-functional teams across task creation, verification, and client delivery, maintaining pipeline reliability on AWS-based infrastructure.

Software Engineer | TiCON System Ltd. | On-site | Full-time

Jun 2021 – Sep 2025

- Led backend architecture and development for 20+ web applications using Python, Django, and Django REST Framework, serving clients across Bangladesh and South Korea.
- Designed and shipped production-grade REST APIs consumed by 10+ client applications, with consistent uptime maintained via AWS EC2, RDS, and S3 infrastructure with CI/CD pipelines.
- Integrated ML solutions — including face recognition, human detection, and AI chatbot capabilities — into 10+ production systems, reducing manual processing workload for client operations.
- Developed real-time sensor communication modules for a Korean Army-affiliated IoT project; represented TiCON on-site in South Korea for client delivery and system implementation.
- Built cross-platform desktop applications using ElectronJS and led frontend contributions using JavaScript and jQuery across multiple projects.
- Mentored 2–3 junior engineers through code reviews, backend architecture decisions, and technical onboarding, improving team delivery consistency.

EDUCATION

B.Sc. in Computer Science and Engineering

Jan 2017 – Jan 2021

Daffodil International University

CERTIFICATIONS

AWS Certified Solutions Architect – Associate | Amazon Web Services | May 2024
