SUMMARY

Experienced software engineer with over 4+ years of expertise in backend technologies, system design, APIs, and cloud architecture. Proficient in data structures, algorithms, and AWS cloud technologies. Proven ability to deliver high-quality solutions under pressure. Passionate problem solver and collaborative team player.

SKILLS

- **Languages:** Python, JavaScript.
- **Backend Development:** Django, Rest Framework, Websocket, Flask, FastAPI, Celery, Redis, MQTT, RabbitMQ, Selenium.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **DevOps and Deployment:** Docker, Docker Compose, CI/CD.
- **Cloud Technologies:** AWS (certified), Heroku, DigitalOcean.
- **Version Control:** GitHub, GitLab.
- **Frontend Development:** HTML, CSS, Bootstrap, jQuery, ElectronJS.
- **Other:** Third-party services integration, Postman, Swagger, Technical documentation.

EDUCATION

Daffodil International University

B.Sc. in Computer Science and Engineering
2017 – 2021

Govt K.M.H College

Higher Secondary Certificate
2013 – 2016

CERTIFICATIONS

- **Solution Architect - Associate**
 - Amazon Web Services - May 2024
- **Python Specialization**
 - Coursera - June 2020
- **Django Specialization**
 - Coursera - June 2020

PROFESSIONAL EXPERIENCE

Software Engineer

Ticon System Ltd. | June 2021 - Present

- Led more than five projects.
- Designed full backend systems for several applications.
- Implemented complete backend functionalities including APIs and Sockets for standalone Django web projects.
- Integrated ML pipeline that processed 5,000+ records/day.
- Developed sensor communication mechanism based on vendor protocol specifications.
- Integrated machine learning models into over ten client solutions.
- Designed cloud architecture, Deployed projects to cloud, Managed cloud infrastructure.
- Customized frontend using Django template programming, Implemented dynamic frontend using JavaScript and jQuery, Implemented basic design using HTML, CSS and JavaScript.
- Implemented Desktop Applications Using ElectronJS, JavaScript and jQuery.

PROJECTS

- **Good Bridge – Border Device Monitoring (Korean Army)**
 - **Technologies:** Python, Django, Django Rest Framework, MySQL, MQTT, ElectronJS, JavaScript, JQuery.
 - **Responsibilities:** Project Lead, System Design, API Implementation, Desktop Application Development, ML model integration, Sensor communication development.
- **Advanced B2B Networking System– BusinessToGlobe**
 - **Technologies:** Python, Django, MySQL, JavaScript, jQuery.
 - **Responsibilities:** Backend Development, Django templating, dynamic frontend customization, Cloud Management.
- **WillAudio – Karaoke Stream Split & Subtitle Generation**
 - **Technologies:** Python, Django, Django Templates, MySQL, Rest Framework, ML.
 - **Responsibilities:** API Implementation, Template Programming, System Design, ML model integration, Cloud management.
